The graph shows the relationship between the length of the hash seed and the percentage of metrics. The x-axis represents the length of the hash seed, ranging from 6 to 11. The y-axis represents the percentage, ranging from 0 to 100. Two lines are plotted: one for recall (green line) and one for precision (purple line). Both lines are nearly horizontal, indicating a high percentage of recall and precision across different lengths of hash seed.
