

All transcripts having non-zero expression values in cell line Gm12878

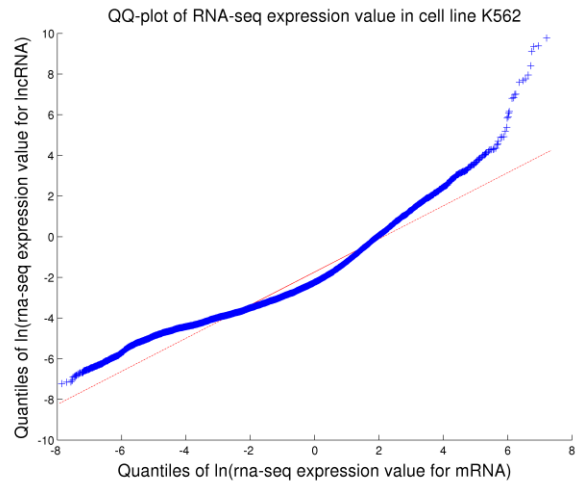

All transcripts having non-zero and similar expression values in cell line Gm12878

All transcripts having non-zero expression values in cell line H1-hESC

All transcripts having non-zero and similar expression values in cell line H1-hESC

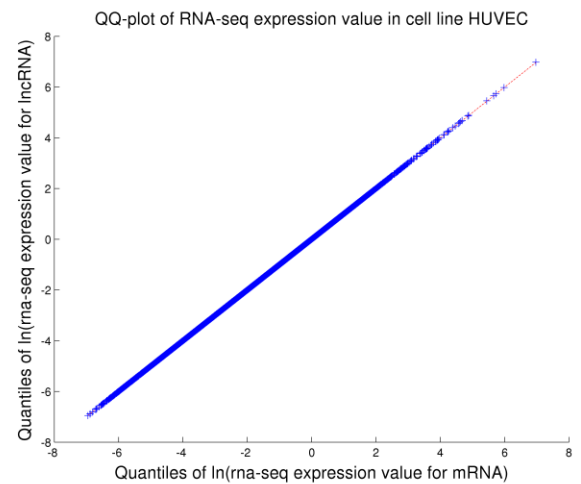

All transcripts having non-zero expression values in cell line K562

All transcripts having non-zero and similar expression values in cell line K562

All transcripts having non-zero expression values in cell line HUVEC

All transcripts having non-zero and similar expression values in cell line HUVEC

Figure S6: Boxplot and Quartile–Quartile plot for expression value of protein–coding genes and lncRNA genes from complete promoter set (CPS) in different cell lines.
